NEW WAYS TO ENGAGE

Use Video: Reels + Stories
If you’ve checked out any social media recently, you might have noticed that video content is often placed at the top of your feed. This is because many algorithms favor video content. After all, it keeps people’s attention longer than text or photos. Create authentic stories and engage with your audience differently—especially Gen Z.

- **Capture attention early:** Meta recommends that you start with your most captivating and attention-grabbing content, incorporate the tone of your brand into your posts and use compelling language in your headlines.
- **Be clear about your message:** Ask yourself, "What do I want viewers to remember?"
- **Design for sound off:** Add captions or text to tell your story visually.
- **Pro tip:** Repurpose video across all channels.

**Direct Messages**
According to Meta, most engagement actually happens in DMs. People find interesting content in their feed, then share that with their close connections in private chats. That avoids judgment and backlash, but it also means that people aren’t as engaged in Meta as they once were.

- Create conversation-focused posts and encourage people to direct message to continue the conversation.
- For paid ads, use click-to-message ads to drive messages on Meta that link to Messenger. It’s a great way to build more direct connections, via the messaging platforms that people are already using.

BEST PRACTICES

From email marketing to social media and website graphics, quality photography should be a pillar of your brand strategy. Nowadays, you don’t need to hire a photographer to get high-quality images for your marketing efforts. With the latest technology built into your smartphone, you can achieve professional-looking photos and videos just by using your phone.

• **Lens:** Wipe your lens off before taking photos.
• **Focus:** To ensure that your subject is in focus as best as possible, all you have to do is tap it.
• **Portrait Mode:** This takes focus to the next level, creating a crystal-clear image of your subject.
• **Lighting:** When taking photos, make sure to use a flash or take pictures in well-lit areas. Shadows can be tricky to work with.
• **Simplify the shot:** Don’t overcomplicate it and include a ton of subjects and detail.
